

VHD Series HEAVY DUTY MOUNT

VibraSystems Heavy Duty Mounts, type **VHD**, are an extension of the **NVS** series and are designed for applications with loads ranging from 20,000 lbs and up per mount. Special construction mounts for heavier loads and specific size requirements are available upon request. The **VHD** mounts provide precise leveling, stability, high deflection as well as superb protection from impact shock forces. These mounts eliminate the need to anchor the machine to the floor. **VHD** mounts protect floors and eliminate the structural damage to the building normally associated with hard mounting. Recommended for the installation of very heavy equipment such as presses, hammers, crushers, rolling mill equipment, heavy vibrators, etc..

SPECIAL FEATURES:

- Built in leveling device enables quick, easy and precise leveling of machinery
- Firmly anchors the machine to the floor, preventing creeping or walking
- Isolates vertical and horizontal forces
- Controls vibration, shock and noise
- Resistant to oil and cleaning compounds
- Meets OSHA requirements for anchoring machinery
- Save on installation costs, no cementing required
- Can be reused when relocating or on other machines
- Strong, reliable construction provides long life
- Increases machine accuracy and extends life of machinery and tools

Type	Maximum load in lbs		In (ins)		Mount Dim. (ins)	
	Non-Impact Machinery	Impact Machinery	Level Adj.	Bolt Size	Base	H
VHD-1	50,000	30,000	1	2-12 x 18	17 x 17	7-3/4
VHD-2	70,000	45,000	1	2-12 x 18	17 x 17	7-3/4
VHD-3	85,000	55,000	1	2-12 x 18	22 x 22	7-3/4
VHD-4	125,000	80,000	1	2-12 x 18	22 x 22	7-3/4
VHD-5	140,000	95,000	1	3-12 x 18	28 x 28	8-1/2
VHD-6	200,000	135,000	1	3-12 x 18	28 x 28	8-1/2
